  - Financial Modeling / Financial Technologies (FinTech)
- Programing and Data Languages:
  - Python
  - Dax
  - Power Query/Pivot
  - Knime

I connect banking, technology, and strategy to deliver measurable business impact. With over 11 years leading digital transformation programs, multimillion-dollar projects, intelligent automation, and innovation labs, I turn ideas into products that create sustainable competitive advantage.

Professional Experience

Scotiabank

Technical Delivery Manager – May 2024 – ongoing

I lead the execution of strategic initiatives within Investment Management, optimizing technology workflows and delivering high-impact outcomes. I manage global, multidisciplinary teams to ensure seamless collaboration between business units, technology, and vendors. By implementing innovative solutions, I consistently exceed critical objectives while maintaining strict control over multimillion-dollar budgets and timelines. My strategic focus ensures project deliverables align with organizational goals and stakeholder expectations.

Senior Project Coordinator – May 2023 – May 2024

Managed large-scale global technology projects with budgets exceeding CAD 25 million, maintaining financial variances below 10%. I implemented hybrid methodologies (predictive and agile) to ensure efficient project delivery and aligned global teams with program objectives. I excelled in leading regulatory and compliance initiatives, designing sustainable and scalable strategies that delivered measurable impact.

Product Owner – Aug 2021 to May 2023 – 2 years

Developed and implemented critical technology solutions, including dual authentication and automation via CIAM (Customer Identity and Access Management). Collaborated closely with international teams and leveraged tools like Power Automate and Pega to streamline processes. I played a pivotal role in defining requirements and strategies, ensuring deliverables met specific business and customer needs.

AML Analyst and Sr AML Analyst – May 2019 to Aug 2021 – 3 years

Transformed compliance processes in international banking through the implementation of advanced tools such as macros and VBA for automation. Led teams focused on operational efficiency, improving key performance indicators by over 20%. Additionally, I designed technological solutions for AML (Anti-Money Laundering) initiatives, optimizing real-time data monitoring and analysis.

Davivienda Bank

Supernumerary – Jan 2014 to Mar 2017 – 3 years

Exceeded expectations by implementing operational improvements across bank branches, streamlining administrative processes and enhancing customer experience. Developed an integrated approach to front-office operations, driving productivity and efficiency. My efforts laid the foundation for more agile and customer-focused processes in a highly dynamic environment.

External and Freelance Activities

2025 SpaceDanta – Fractional Executive

Provided strategic and financial advisory for an XR/VR/AR startup, supporting leadership in designing growth strategies and scalable business models. Designed and implemented a digital financial model that strengthened cash flow management and improved the startup's financial resilience. Developed and deployed a performance model combining Scrum, Kanban, and a personal-purpose framework, enhancing team efficiency, focus, and delivery results.

2020 Freelancer digital project

I have created a digital stock and data mart for a retail business utilizing predictive analytics and Microsoft Automated Apps.
